Green Stars Rating Initiatives for Hotels & Hospitality

Green Stars Rating for hotels and hospitality is necessary to address water stress and water footprint issues (Measure, Monitor and Mitigate), Energy efficiency beyond incandescent lamps, AC chillers, Waste management impacting landfills, and emission of GHG impact. And developing human capital for the job opportunities for local workforce.

Green Stars Rating Initiatives for Seaports

UN Charters passed in 2013 prohibits sea dumping of any waste streams. Vessels (Cargo or cruise-liners) need to dispose the municipal waste streams e.g. paint cans, aerosol cans, used cooking oil etc.

Provectus is engage with seaports to receive the waste streams to create circular economy that creates local workforce while addressing and maintaining of ZERO Waste and Green Ports Certification process.
